

ABSTRACT

For 3rd UC Forum on the Future of Nuclear Power

June 11-12, 2009

Issues for Proliferation Resistance and Physical Protection (PR&PP)

Robert A. Bari

Brookhaven National Laboratory

This presentation is an overview of some key issues for PR&PP. Accomplishments and progress within the Generation IV PR&PP program are reviewed to provide a context for these issues as they relate to future nuclear energy systems. Related international programs are discussed with regard to their connection to PR&PP and future activities are outlined.
