

Bio:

Mark Snell was granted a PhD in Operations Research from Cornell University in 1979. Since that time he has worked at Sandia National Laboratories in the area of nuclear security vulnerability assessments. Dr. Snell was involved in earlier years in projects to develop vulnerability assessment software tools. Currently, he has served as an instructor in nuclear security courses for the IAEA and as a PP consultant for the Proliferation Resistance and Physical Protection Evaluation Methodology Working Group of the Generation IV International Forum.

I suspect it may need R&A.
